P R E F A C E.

This cabinet is an ideal one, nearly every country and period being represented in its well-filled drawers: the object of its owner being rather to trace out the rise and fall of nations and their rulers, than the accumulation of a series of coins of consecutive years in perfect preservation. The latter is simply a matter of money, while a collection such as this, is a course of study, an ever open incentive to research and a never failing source of intellectual activity and amusement.

Although the collection contains many U. S. and other American coins including some pieces much sought after by collectors of the American Series, it is essentially an European one, and is remarkably rich in the coins of the various cities, states and princes of that continent. These combined with a fine selection of Asiatic and ancient pieces, open to collectors a wide field for selection.

Coins have never been lower than they are at this time so we would advise all collectors who can possibly spare the time to attend the sale in person and pick up some of the many bargains which will doubtless abound, but those who cannot attend can of course send their bids to the different dealers who make a specialty of attending sales in the interest of the collectors who employ their services, for a commission of 10 per cent. on amounts under \$100—over \$100, 5 per cent. —a uniform charge of fifty cents made on any amount under \$5.

In reference to the method of selling at auction, we would say that each lot is sold to the highest bidder, at so much for each coin in the lot, so if you desire a lot of coins which contains 10 pieces and you wish to pay \$1.00 for it, you should bid 10 cents each. Always state your highest price, relying on the honor of those you employ to make the purchase for you at the lowest possible figure.

The coins will be on exhibition at the Auction Rooms, on the day of sale, from 10 A. M. to 5 P. M.

SCOTT & COMPANY.

NEW YORK, November 20, 1883.

NOTE.—Every coin catalogue is warranted genuine unless otherwise described.

Priced catalogue will be furnished after the sale at \$1.00 each.

CATALOGUE.

NOTE.—As this is a private collection in which every piece is different, the lots containing many pieces will be "Mixed" or "Assorted," but in every case are composed of pieces all different.

GERMANY.

Note: The collection of German Coins here offered is as to Copper, fuller, and more complete than any that has been presented for sale for many years, (if at all), in this country. It contains good examples of the minor coinage of nearly every Duchy, Principality, Free City and Town, the very names of many of which have never before appeared in an American Catalogue. While largely of Copper, this collection however is not destitute of good specimens of the coinage in nobler metal, and contains many fine Crowns and rare old Silver Groschen.

The Copper coins are above the average condition of such pieces, and no special description as to condition will be given except when occasion seems to particularly require it. All pierced coins, (of which there are very few) will be specially mentioned.

Note :—Archbishop Sharpe in writing on the difficulty of distinguishing the coins of Edward I. and II. remarks : "All that I dare affirm with confidence is that all the coins where only the first three letters of the name are put, *viz.* E D W, belong to the first Edward. My reasons for this are two : first, these coins are in much greater plenty than the others. I dare say I have met with five of these for one of the others. Now, everybody knows that Edward the First coined more abundantly than his son, and therefore in reason those must be his, of which there are most remaining." Mr. Bartlett, who had studied the subject with great care, established the following rule of appropriation : "All coins with E D W belong to Edward I., all with E D W A, or E D W A R to Edward II."
